

Enter the Argocat

This is the Argocat Professional, an amphibious vehicle which can be seen on the Crayford Auto Development stand (150) at the Motor Show. It is powered by a 28 hp air-cooled, twin-cylinder two stroke which chain drives all the wheels. The Canadian

makers claim that it can "cruise at 40mph over rough country carrying a 700lb. payload". The tyres are run at a very low pressure.

The Argocat is being marketed in Europe by All-Terrain Vehicles Ltd of Oxted, Surrey and costs £1550. A six-wheeled version is offered at £1095.
