ROLLSPORT

AT LAST!!

A "TRUE" Winter-Summer Vehicle.

HERE'S WHY . . .

The massive floatation of the 8 specially designed tires, combined with a revolutionary new principle of continuous power with steering; plus a narrow 4'' center, means it stays not in but on water, mud, snow, slush, muskeg, quicksand, etc. making it virtually impossible to mire or "hang up" at any time, in any type of terrain.

If interested or curious: Write, phone or visit the designer . . .
