# Able-bodied fun machine.

## The Marlex® Marketing Team helped create it.

It's a car. It's a boat. It's a super-buggy.

All-terrain vehicles must suffer indignities in forests, swamps, sand dunes, streams and snow banks. Giving them super-tough bodies that wouldn't crack, rust, chip or peel—wherever they go—was the problem.

A Marlex Sales Engineer helped solve it.

And this is how he did it. First, he recommended the right

Marlex resin...one with superior environmental stress cracking resistance, impact strength and weatherability.

Then he called in other Marlex Marketing Team experts in extruding and thermoforming high density polyethylene. The result: a durable plastic body with performance to spare.

That's the way our Marlex Sales Engineers work. And that's why, if you

have any reason to work with plastics, you have every reason to work with Phillips—inventors of the leading process for producing high density polyethylene. The only producers of genuine Marlex, the resin that's worth more.
