Upper body colors include Ox Black, Ox Green and Ox Red.

6 Wheel Amphibious Trailer: Based on the lower chassis of our vehicle lineup, the amphibious trailer can be towed through rigorous terrain. Our swiveling hitch design provides optimal maneuverability. The trailer can be fitted with a variety of accessories.

Vengeance: The answer to a cost-effective, nimble 8x8 amphibious ATV. Vengeance uses CVT clutches to power a twin planetary transmission for true all-wheel drive and smooth turning. Various gasoline EFI engines are available.

XL: A true workhorse. The Kubota engines directly drive a hydrostatic driveline for precision handling in extreme conditions and hill descends. Instant forward/reverse and counter rotation.

Fort Mac: Industrialized brute strength. Designed specifically for high demand applications by eliminating chain and bearing maintenance on the axles. Four individual hydraulic wheel motors directly drive the track system.
